

# Action Taken Report on Student Feedback (Session 2024–2025)

S.No.	Student Feedback	Planned Action for Upcoming Session (2025-2026)
1	Use of ICT in teaching can be improved.	Teachers will be advised and encouraged to make greater use of smart classrooms, presentations (PPTs), videos, and various online resources to further facilitate ICT-based learning.
2	Opportunities for internship, student exchange and field visits should be increased.	The college will schedule more field visits. For internships, the college will register students in self-training modules and explore free online platforms to increase student opportunities.
3	Overall satisfaction is good	The college will maintain the high quality of teaching while improving identified areas.

The college is delighted to report an **excellent overall student satisfaction rate of 90 %**. Building on this success, our primary action plan for the upcoming 2025-2026 session will focus on maintaining these strengths, such as ensuring **course objectives and outcomes are clearly defined**, the **syllabus is completed on time**, a **comprehensive teaching plan and weekly schedule** are shared promptly, and all **assignment and test schedules are communicated well in advance**. We will also remain dedicated to **maintaining and expanding our doubt-clearing sessions** and continuing the practice of **frequently sharing evaluated work and providing feedback**. Furthermore, we plan to enhance the learning experience by **expanding the inclusion of real-life examples and case studies**. Most importantly, the action plan will also **aggressively address the specific areas that received lower scores**, ensuring a comprehensive approach to continuous improvement.
