

Report on World Ozone Day

On 16 September 2025, the Eco Club celebrated World Ozone Day under the theme “*From Science to Global Action.*” The 2025 theme “From Science to Global Action” reflects how scientific discoveries about ozone depletion (e.g., CFCs, HCFCs etc.) have led to global agreements like the Montreal Protocol. Observing this day reminds us that despite progress, continued vigilance is needed, especially in reducing ozone-depleting substances and embracing sustainable alternatives. The event was marked by a variety of competitions such as declamation, essay writing, and poster making through which students displayed their ideas and creativity.

The college principal, **Dr. Prem Parkash Chauhan**, addressed the gathering and spoke about the critical role the ozone layer plays in protecting human health, agriculture, and marine life. He compared current environmental challenges with those of past decades, emphasizing how depletion of the ozone layer arises from human activity. He also explained practical ways to protect the ozone layer, including reducing the use of harmful chemicals and choosing ozone-friendly alternatives.

In the declamation competition, **Anjali**, a B.A. 1st-year student, achieved first position, Ronika, a B.A. 3rd-year student secured second, and Rajat, also from B.A. 3rd year came in third position. In the essay writing competition, **Sadhna**, a B.A. 2nd-year student, attained first position. In the poster-making competition, **Rimpika** of B.A. 3rd year attained first position, Ridhil Khoond, a B.A. 2nd-year student got second, and Anjali (B.A. 1st year) achieved third position.

The programme successfully raised awareness among students about ozone protection. It reinforced that science has long warned us about ozone depletion, but action—global cooperation, policy change, and

individual choices—is essential to ensure the ozone layer’s recovery and safeguard the environment for future generations.
